

Johnson Controls unveils powerful Flex IR PTZ for enhanced resolution and control

MILWAUKEE (October 29, 2018) – [Johnson Controls](#) has developed a competitive Illustra IR PTZ camera with powerful zoom and control capabilities to handle even most challenging lighting conditions.

Illustra Flex IR PTZ indoor and outdoor cameras feature a 30x optical and 12x digital magnification to effectively resolve scene details at up to 1000 feet. The powerful IR illuminators on the outdoor model allow for a night scene illumination of up to 150m. Packaged in a bubble-free, environmentally sealed, and vandal-resistant design, the Flex IR PTZ maximizes video quality at any tilt angle.

Illustra® IntelliZip provides powerful bandwidth management beyond H.264 and H.265, reducing network bandwidth and video storage requirements. This embedded technology continuously monitors and optimizes system streaming parameters to match the level of activity within the camera's field of view, offsetting the added video storage required when streaming at 4K resolution.

For crystal clear images day and night, the versatile Illustra Flex cameras feature True Day/Night and True Wide Dynamic Range for balanced images in challenging lighting conditions.

The Flex IR PTZ adheres to the rigorous security standards of the Tyco Cyber Protection Product Security Program. The holistic cyber approach begins at initial design concept, continues through product development, and is supported through deployment.
