## **Johnson Controls expands IP camera portfolio with high resolution, bandwidth efficient 4K cameras**

*Illustra Flex cameras offer a full feature surveillance option for a wide range of security applications*

**MILWAUKEE** – (May 24, 2018) – [Johnson Controls](http://www.johnsoncontrols.com) has announced the expansion of its high-resolution IP camera portfolio with new models of Illustra Flex Mini-Domes and Box IP cameras in 4K resolution. These new cameras are designed to offer a high-image quality and feature rich surveillance option intended for a wide range of applications. The Flex 4K cameras provide increased detail and efficient bandwidth management technology for both indoor and outdoor models.

The versatile Illustra Flex cameras feature effective bandwidth management technology and highly reliable and redundant recording features that ensure continuous and cost-efficient video streaming. Illustra® IntelliZip compression technology provides powerful dynamic bandwidth management beyond H.264 and H.265 to offset increased video storage requirements from high-resolution video recording.

For crystal clear images day and night, the versatile Illustra Flex cameras are True Day/Night and feature True Wide Dynamic Range for balanced images in challenging lighting conditions. The affordable and compact Illustra Flex Box Camera is best suited for small to medium size offices, retail boutiques, schools, and bank branches looking for a cost-effective camera.

The Flex Mini-Domes feature the same day/night capabilities, but also offer a P-Iris lens, which delivers clear video and improved depth of field in changing light. In addition, the outdoor Flex Mini-Dome features built-in IR illuminators to produce clear images at an effective distance in a variety of low light conditions.

The Flex Mini-Domes and Box adhere to the rigorous security standards of the Tyco Cyber Protection Product Security Program. The holistic cyber approach begins at initial design concept, continues through product development, and is supported through deployment, including a rapid incident response to meet the comprehensive and evolving cybersecurity environments.

For more information on the Illustra Flex 3MP and 8MP cameras, visit [www.illustracameras.com](http://www.illustracameras.com).

### **About Johnson Controls**

Johnson Controls is a global diversified technology and multi-industrial leader serving a wide range of customers in more than 150 countries. Our 120,000 employees create intelligent buildings, efficient energy solutions, integrated infrastructure and next generation transportation systems that work seamlessly together to deliver on the promise of smart cities and communities. Our commitment to sustainability dates back to our roots in 1885, with the invention of the first electric room thermostat. We are committed to helping our customers win and creating greater value for all of our stakeholders through strategic focus on our buildings and energy growth platforms. For additional information, please visit <http://www.johnsoncontrols.com> or follow us @johnsoncontrols on Twitter.

### **About Johnson Controls Building Technologies & Solutions**

Johnson Controls Building Technologies & Solutions is making the world safer, smarter and more sustainable – one building at a time. Our technology portfolio integrates every aspect of a building – whether security systems, energy management, fire protection or HVACR – to ensure that we exceed customer expectations at all times. We operate in more than 150 countries

through our unmatched network of branches and distribution channels, helping building owners, operators, engineers and contractors enhance the full lifecycle of any facility. Our arsenal of brands includes some of the most trusted names in the industry, such as Tyco®, YORK®, *Metasys*®, *Ruskin*®, Titus®, Frick®, PENN®, Sabroe®, Simplex® and Grinnell®.
